

Ultra High Flow Water Conditioning

From the moment you install the Pro series professional water softening system, everyone in your home will notice the satisfying benefits of consistently fresh softened water. PureFlo softeners include our USA made mineral and brine tanks, high grade long lasting resin, quartz under bedding, and the highest quality components throughout. We use the same components in our residential series softeners as our commercial product offering ensuring you years of trouble free service.

Skin and hair are smooth and velvety

Revolutionary i5 Control Valve

- ◆ Dual MAV drivers, timed, flow, regeneration, cycle based control
- ◆ Dual relay driver, highly programmable
- ◆ 1", 1.25", 1.5", 2" single, 1" and 1.5" twin plastic, 1.5" and 2" brass
- ◆ Progressive flow without a system controller, up to 4 units
- ◆ Programmable service alarms based on time and/or volume used
- ◆ Algorithmic salt level indicator

Benefits of the Pro Series

- ◆ **WQA certified Softening Resin** ensures highly refined and truly softened resin greatly exceeding the performance of non salt systems!
- ◆ **Richer, foamier lathers** from soaps and detergents.
- ◆ **Fluffy and absorbent towels** that soak up water like magic and feel silky smooth against your skin.
- ◆ **Streak free glassware**, without the filmy damage that robs fine crystal of its beauty.
- ◆ **No more stains** and scaly buildup on sinks, tile and plumbing fixtures.
- ◆ **Money saved** by buying less soap and eliminating the hard water buildup that makes water using appliances less efficient and shortens their life.

i5 Technology Hard at Work

- ◆ The i5 series controller by PureFlo
- ◆ Simple and intuitive programming
- ◆ Exceptional troubleshooting and diagnostics capabilities
